**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-21 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Applicant invention is drawn to a new service destination determination switching system is provided for a telecommunications environment in which a called party has discontinued an old service destination and obtained a new service destination. The new service destination determination switching system is used to obtain the new service destination when a calling party places a call to the old service destination. The switching system includes a hub switch that receives a rerouted call from an old service destination switch. The hub switch corresponds to a routing number prefix used to reroute calls from the old service destination switch to the hub switch. The routing number prefix causes the hub switch to initiate a trigger to a network platform that obtains the new service destination.

Prior art of record failed to teach or fairly suggest in combination the system and method as described by applicant claimed features that are similar to the above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any response to this action should be mailed to:
